

ACUPRESSURE & ORIENTAL MEDICINE

Andre Borak graduated from Ohio College of Acupuncture and Herbology with a 5 year Doctorate degree in Traditional Chinese Medicine and has been a Holistic Health practitioner for 10 years.

By triggering acupressure points, Andre can help with pain and stress relief, women's issues like menopause, sports injuries, rehabilitation and difficult to treat ailments.

Andre also specializes in cosmetic facial rejuvenation and revitalization, by reducing the appearance of wrinkles, lifting sagging cheeks and double chins.

By using laser, magnetism and tuning forks all of this can be accomplished without pain or bruising. The photon sound beam is a century old technology that uses hypercharged inert gasses to create plasma and ozone. These will in effect bring circulation to the face and body, detoxify, ozonate and relax.

This treatment is designed to help you look and feel younger.

By combining these non-invasive methods and techniques, you will experience something that is truly unique, effective and balancing to body, mind and spirit.
