

## INFORMATION • COMMUNIQUÉ

As a business operating in communities across Canada, Delta Hotels recognizes and respects its corporate social responsibility to make them stronger and better places to live. As a quality organization, this is a key focus for our hotel and our company.

To that end, we will consider the environment in our decision-making, striving to take actions that will not negatively impact the environment and that will go beyond meeting existing regulations and legislation. As an indication of our commitment, Delta Hotels partners with the Hotel Association of Canada. Through its well-regarded Green Key Eco-Rating Program our hotel currently holds a Four Green Key rating. This rating indicates that the Delta Chelsea has shown national industry leadership and commitment to protecting the environment through wide-ranging policies and practices.

To improve our environmental performance, we have:

- Created a dedicated cross functional employee “Green Team” to spearhead our efforts
- Established excellent waste management and recycling programs in partnership with Turtle Island Recycling
- Installed T8 lighting throughout various public areas in the hotel
- Established a “Green Day” as part of the annual Health & Wellness Week
- Implemented a community outreach program in support of the “Back to Work” program for persons with addictions

Looking forward, we will:

- ❑ Continue to maximize our waste stream diversion of recycled materials as well as reducing consumption of hydro, gas and water
- ❑ Comply with appropriate environmental legislation as well as exercise best practices at all times
- ❑ Consider the environment when making purchasing decisions
- ❑ Review our goals and objectives with respect to the Hotel Association of Canada’s Green Key Program on an annual basis
- ❑ Communicate our efforts to our guests and welcome their feedback on our environmental initiatives
- ❑ Establish partnerships within our community so that we can share our message
- ❑ Define areas requiring improvement and innovation and support the efforts of the Green Key Environmental Committee.

As a quality organization, the Delta Chelsea Hotel will continue to listen to our guests, employees, industry and community partners and seek ways in which to improve and build upon our “green” activities.
